

# Quality policy

LEONI Wire & Cable Solutions Division is a global provider of products, solutions and services for energy and data management in the automotive sector and other industries. Particularly in the wake of digitalization intelligent cable systems, components and smart services are gaining importance. Together with international customer networks and strategic partnerships, this is creating new, digital business models – individually tailored to customers' requirements.

## Our vision

The quality policy supports the implementation of our strategy and outlays the framework for setting out our quality objectives.

As a global company, we strive to interlink economic success with responsible behaviour towards people, the environment and **SOCIETY**. We justify the confidence that our **INVESTORS** place on us with it. We are committed to constantly develop our process-oriented quality management systems and aspire to continually improve our processes, products and services.

## Our principles of action are:

- To benchmark our work opposite the fulfillment of our customers' requirements. **CUSTOMER** satisfaction is the foundation for continuous and sustainable economic success. Compliance with legal and other requirements is a prerequisite for it.
- We work with reliable **SUPPLIERS** whose products and services meet our quality standards.
- We foster our **EMPLOYEES'** skills and thereby strengthen their awareness towards quality.
- We strive for utmost error prevention in all the processes in our company. In this regard, we take a preventive and risk-based approach.

The success of our management systems is the result of the joint efforts made by all of our employees.
